

CSE 410

Software Development

On week 5, you need to present an Entity Relationship Diagram (ERD) and a Class Diagram (CD) for your proposed system. You are free to use tools like [Lucidchart](https://www.lucidchart.com/) or any other suitable software to create these diagrams. To avoid confusion regarding conventions, we have provided an example image of both the ER Diagram and Class Diagram for reference. Please try to follow this convention while creating your diagrams.
